

Without a crisis, without a storm in the Gulf, we have \$90 a barrel oil, and it hit \$92 today. I am going to conclude my comments this evening with America needs a bona fide energy plan. We need to open up the Outer Continental Shelf where we are energy rich.

My legislation opens it up for natural gas, and I hope we can get it considered. I will conclude with that chart. Our bill says that the first 25 miles remain locked up, and you can only see for 11 to 12 miles, so nobody will even see it. It will not hurt the shoreline. It won't be unsightly. The second 25 miles are options of the State. If they want to open it, they can. The second 50 miles are open automatically for natural gas, but the States still have the right to close it if they choose to. By passing a law with the Governor's signature, they can keep it closed for the first 100 miles. The second 100 miles it is open. That is a pretty soft bill. That is not what I would like to do, but that is what I hope to coax this Congress into doing so we do something for natural gas.

We will give \$150 billion in royalties to the States, \$100 billion for the treasury, \$32 billion for renewable energy. That's real money to help renewables; not promises, real money; \$32 billion for carbon capture sequestration research, and that can come from the payments of royalties; \$20 billion to clean up the Chesapeake Bay, exactly what they have been needing; \$20 billion to clean up the Great Lakes restoration, exactly what they have been needing; \$12 billion for the Everglades; \$12 billion for the Colorado River basin; \$12 billion for the San Francisco Bay restoration; and \$10 billion to help the poorest of Americans winterize their homes and pay their heating bills in the wintertime.

Folks, the NEED Act is the act Congress needs to pass. We have 160-some cosponsors. It is bipartisan. The gentleman from Hawaii (Mr. ABERCROMBIE) is my co-partner on this bill. It is the bill that America needs to have in its energy package, but neither the House nor Senate are talking about it.

On top of natural gas and offshore, we need to have a plan for nuclear, the expansion of nuclear in America. We need to have a plan where we are moving forward with coal to liquids and coal to gas. We need to have a plan where we push wind and solar and all renewables. And yes, we should look at many dams we have that are not harnessed, harnessing them for hydro. There are many dams in America that could be harnessed for hydro.

And yes, we need to do ethanol and biodiesel and cellulosic ethanol. Land-fill gas should never be flared. It should all be plugged into the energy pipeline. We need to get serious about not wasting energy in America, conserving energy in America, and producing energy for Americans that is affordable and available so this winter they can afford to heat their homes, they can afford to run their businesses, and the jobs will not be pushed offshore.

High energy prices have pushed more jobs offshore than any other fact that this Congress talks about. And energy has the potential of pushing almost every manufacturing and processing job that is left in America offshore if we don't deal with the energy issue. Energy is a crisis for the future economic viability of America.

I challenge this Congress, both bodies and the White House, to get serious about it. Affordable, available energy for America, we could do no more. That's the least we can do to make sure Americans have the quality of life that they should have, they have a right to, and they deserve.
